Ideas For BNS Application Screening:-

Snehasis Saha

1) Firstly, I was thinking of ordering the results of the "Non updated candidates" page according to a criteria, like income, etc. or whatever you want the results to be ordered according to. So that the most eligible candidates would be viewed on top. Currently it is being ordered according to the date of receipt of the application.

2) Then I can add another page for incomplete applications. You can give me the fields, which if not there , the form can be considered to be incomplete.

   There will be two options on this page "reject" and "bulk reject". In "reject "you can just reject selected candidates. In "bulk reject" by clicking a button all candidates on the page will be rejected.

3) Another option I was thinking of in the "non updated candidates" section is the "reject all" button. In this all those candidates who have not been shortlisted or waitlisted will be rejected automatically.

So using the above it will be much more easier for you to shortlist your required candidates.
